ABOUT ME

My name is Zayd Inani, a 25-year-old Full Stack Web Developer skilled in designing and developing modern, efficient websites. I'm proficient in various programming languages and tools, allowing me to deliver high-quality, tailored solutions for businesses. I've helped businesses establish a strong online presence by creating user-friendly designs optimized for performance and SEO, enabling them to rank higher, attract more clients, and achieve their goals. My focus is always on combining innovation and functionality to meet client needs

PROFESSIONAL PROJECTS.

AS IMMOBILIER   2023

web design and development

As Immobilier is a real estate business specializing in buying, selling, and renting properties. I designed their website to align with their brand identity, creating a modern and professional look. The website was developed using WordPress, ensuring a user-friendly experience and easy management of property listings.

SNEAKERLY   2024

web design and development

Sneakerly is an online store specializing in selling shoes from various global brands. I designed and developed their e-commerce website using WordPress and WooCommerce, creating a modern, user-friendly platform that reflects their business identity. The website features intuitive navigation, detailed product displays, and a smooth checkout process to provide customers with a seamless shopping experience.

MADINA   2024

web design and development

Madina is a restaurant offering a variety of delicious dishes for pickup. I designed and developed their website using WordPress, WooCommerce, and the Orderable plugin to create a modern, user-friendly platform. The website allows customers to easily browse the menu, customize their orders, and schedule pickups, all while reflecting the restaurant's unique brand identity.
